About

MERN stack web developer. Being self-taught has allowed me to develop skills such as adaptability to new technologies, time management, and the ability to solve complex problems. Each project represents a significant improvement in my programming skills. I actively seek opportunities to learn and apply new technologies, which enables me to constantly update my knowledge, bringing value and professionalism to the projects I am involved in.

Projects

Authentication App •

Create and edit your profile, you can register with OAuth.

Next.js   TypeScript

TailwindCSS   MongoDB
